

MEASURING YOUR RING SIZE

HOW TO MEASURE YOUR RING SIZE

Measuring your ring size is easy, but it does need to be accurate. Please be sure to use a ring that you own and wear on the finger you would like your ring to fit on.

Method 1: Simply measure the inner diameter with a ruler, making sure you measure the widest points. Once you have measured your ring match the diameter to a ring size on our chart.

Method 2: We have a useful sizing chart and measuring system that you can view, download and print.

DISCLAIMER

Our suggestions are not a guarantee of items fitting, but rather a guideline.

We are unable to give you an exact suggestion as rings differ depending on the metal width and personal preferences on fit.

Should you require a second opinion on your sizing, please feel free to take a photo and send it to us. This will allow us to guide you prior to your order being placed.
